Meeting Minutes

Present: Ben Jamison, Nelson Doebler, Steve Wilver, Todd Oberdorf, Josh Satteson, Jenna Neidig, and Kim Holley.

The WDTSA August meeting was called to order by Vice Chairman Ben Jamison at 6:30 PM.

Engineer's Report: HRG provided scans of all the original collection system, wastewater plant plans from 1971, and a copy of a 1999 water quality management permit that was received from DEP for WDTSA's records.

Since the last meeting HRG has completed 27 additional basement inspections. There are 11 remaining parcels that have been posted with a notice to contact HRG to schedule inspections. The board discussed how to negotiate with those owners that refuse or ignore requests to perform the required basement inspections as stated in WDTSA's corrective action plan. Discussion to continue.

HRG has been actively working to update the GIS data with the information gathered from the inspections. A summary of GIS updates was attached for reference.

HRG completed the hydraulic evaluation for the new pump station and has determined that the flow information gathered from permits, pump curves, Chapter 94 reports, and draw-down testing is

inconclusive. An additional test is recommended to collect a more accurate flow rate. HRG discussed flow metering at the proposed flow station that is required by DEP. The wetland investigation did not return results of the wetlands within the project limits. HRG is actively working with a geotechnical consultant on a project adjacent to this project site and is proposing to utilize the data gathered from the project's borings for this project.

Ms. Neidig discussed the parcels in question during the last meeting concerning the New Columbia pump station. A title search is recommended. Ms. Neidig will investigate and contact a title search company to get information on ownership.
